

This week at Little Learners:

We got physical outside in the garden. We had to use our listening and understanding skills to follow an instruction to do a physical activity for one minute; we used a sand timer to measure a minute.

We had to try press ups, holding the plank, hopping, touching our toes, hula hooping, balancing and running. We needed a drink afterwards and talked about how exercise makes us feel.

We took part in a table top game to help our understanding of phonics. We had to match puzzle pieces with a picture of an item and the word. We also tested our knowledge with an Opposites game.

We continued to do our daily phonics sessions, learning to link letters and phonemes. This is good preparation for school.

Some of us went exploring around the school grounds. We found lots of numbers on a snake and tried to recognise some of the numbers. We also stood on a big number square where the top number is 100, which is a very big number! We found lots of pictures of planets and the sun. We talked about the names of the planets and know that we live on planet Earth. We looked at a big map of the world and tried to find Leighton Buzzard.

We tested our fine motor skills this week drawing with stencils; we also did chalking outside on the path and used the paint brushes dipped in water to mark make. We used a knife to cut play fruit and pizza. We talked about what food we like and dislike and what foods are healthy for us.

It was hot this week so we had lots of sand and water play in the garden and one of our favourites- blowing bubbles!

In malleable play we made 'cakes' from compost and pasta and 'cement' using sand and water.

We had some new bells delivered and had fun shaking them, they made a tingly sound. We listened to instructions to play them loudly or softly and also how many times to shake them.

On Friday it was 'Wear pyjamas to school day'. We dressed up in our PJs and some of us brought our teddy bears to school too.
