

**Signs of New
Life around
Easter time**

Easter takes place in Spring Time, when lots of new life can be found in Nature.

Christians believe the Easter story leads to ideas of a new life.

Next week, we will be looking at the Easter story.

For this week, I'd like you to think about what you know about Easter. You might know some religious things (why and how it's celebrated) or you might know about some secular ideas about Easter (for example, what might I expect to find in the shops?) If you don't know about Easter, that's ok – we can find out together.

Can you share what you know already on Seesaw?
