

Design and Technology Challenge

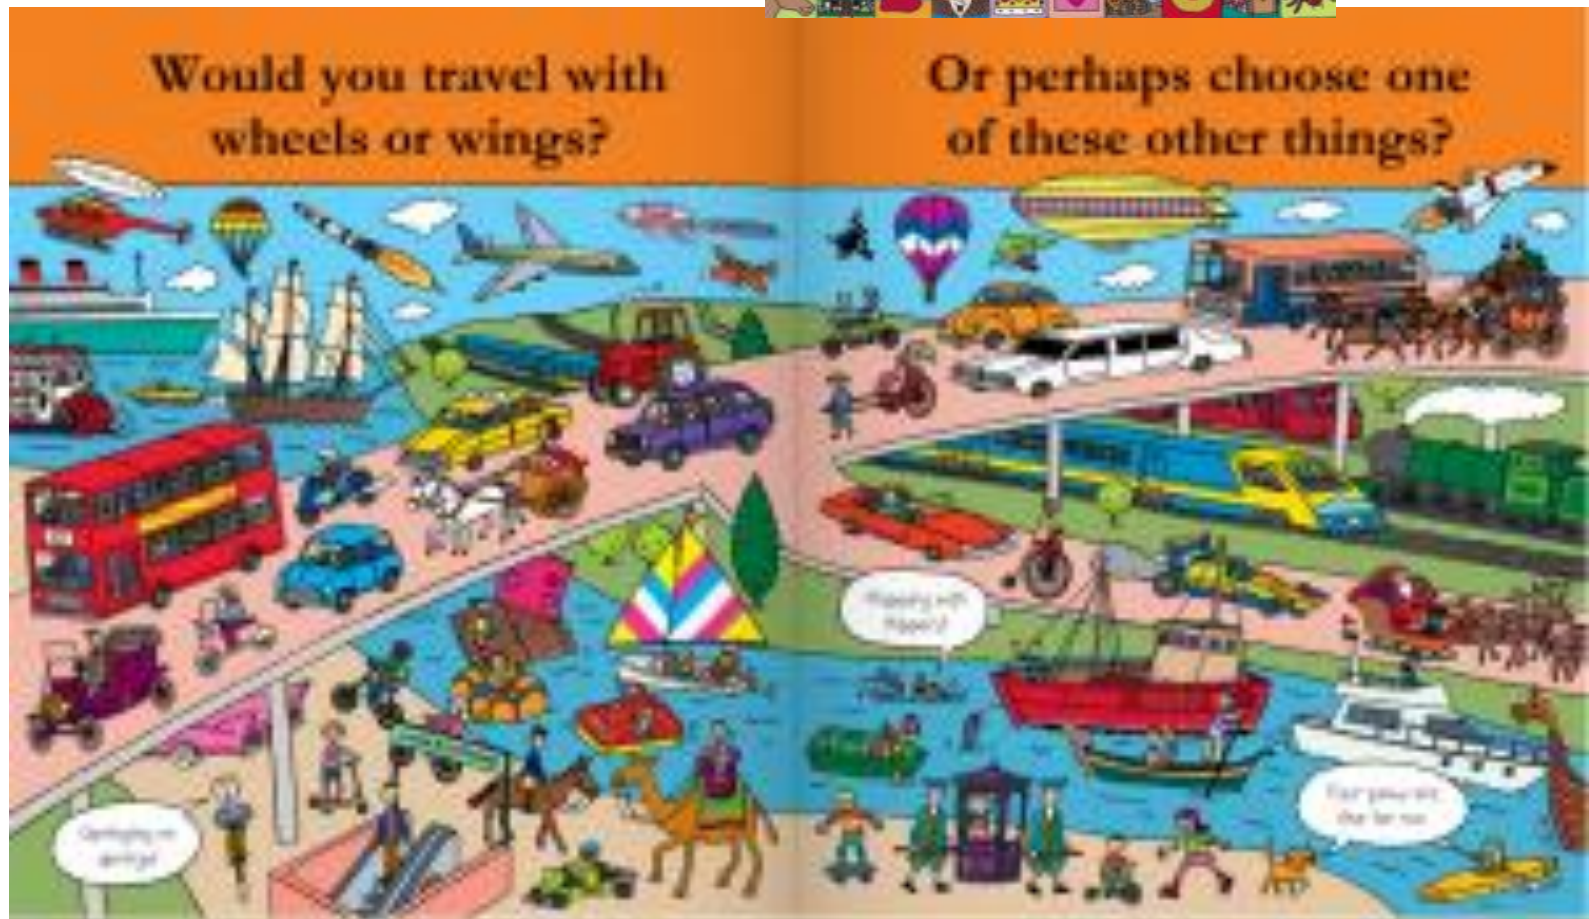

Make a vehicle!

Your brief:

- Design and make any kind of vehicle using recycled junk from around your home.
- Look at what you have collected, and think about the shape and size of your objects – what might they be useful for?

YOU CHOOSE

?

Things to think about...

- *Will you need to cut some of your objects for them to fit your design?*
- *How will you make sure each part of your model sticks together.... without falling apart when you play with it!*
- *If it has wheels, can you make them turn?*
- *If it's a boat, can you make it float?*

and finally....

Give your vehicle the **wow** factor by
decorating it in your choice of colours and
patterns!
