

MAKE A
PIRATE
TREASURE MAP!

First, make your paper look very old,
so that everyone will think it's a **REAL** treasure map from long ago!

'Age' your paper with tea bags:

- Soak the tea bag in a small amount of hot water for a few minutes.
- Dab the tea bag all over the paper
- Dry it out on a radiator or with a hairdryer

Have a look at Satellite maps (eg, Google Earth) online to get a “bird’s eye” view of the world

To make a your map, you have to imagine what you would see from above:

- What shape will your island be?
- What features will it have (volcanoes, forests, beaches...)
- Is it deserted or inhabited? If people live there, have they built huts or maybe a pier to tie up their boats?

You could name different parts of the island. Where is the treasure hidden?

X marks the spot!

- When your map is complete, roll it up into a scroll.
- Tie a ribbon around it so spies (or brothers and sisters) can't see where the treasure is.
- Keep it in a VERY safe place
- Share with pirates on Seesaw (if you dare!)
