

YOUR PIRATE CHALLENGE

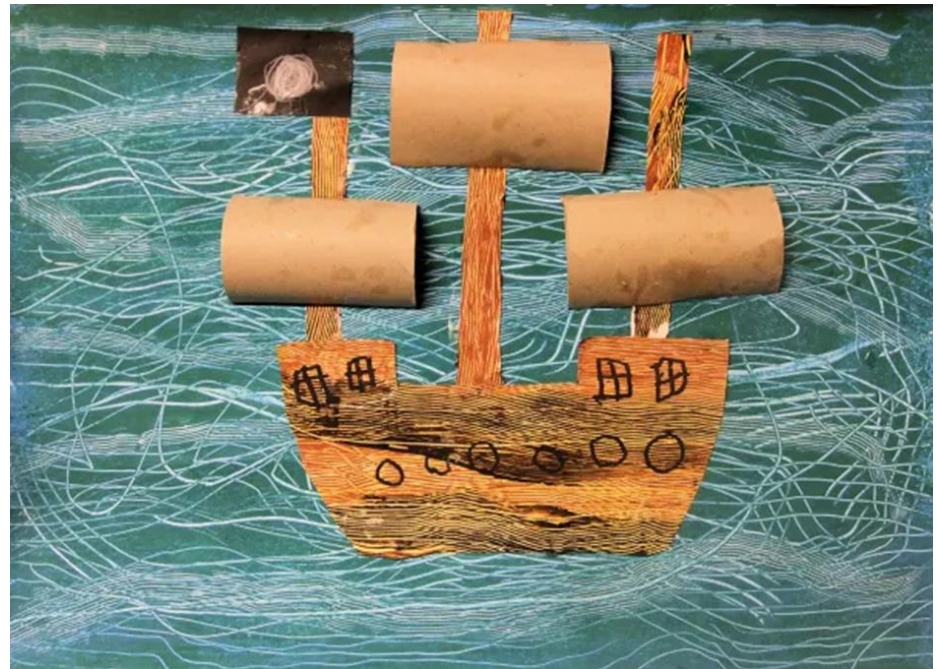

Make a pirate ship picture with a variety of *textures*, using a range of *materials* of your choice.

“Texture” is the *feel* of the materials you use.
You will be making a picture that is 3D, not flat.
That will make it lively and exciting!
Scraps of torn or cut-up paper, card, or magazines
are all useful, and so are scraps of fabric.
Cutting and sticking to make art it called *collage*.

You will need to create your *background* first

- Fill your sheet of paper with the sea and sky, like in these pictures.
- If you are using paint, you can make waves by finding something like a skewer to create patterns while the paint is wet

Look at this stormy scene

- *How do you think the sky was made?*
- *Perhaps* it was printed using paint on a sponge
- *What about the sea?*
- Can you see the white, foamy tips of the waves? How could you get this effect?

While the background is drying...

- Get your materials ready for making the galleon.
- You can use whatever you like – just make sure that your picture has texture, instead of just being flat... it should be 3D not 2D!
- Decorate scraps as you like – paint, crayon, felt-tips, or anything else you have.

FINAL TIPS

- Arrange your ship on the background **BEFORE** sticking all the pieces in place.
- *Don't forget to give your ship a flag!*
- **Have fun, share your art on Seesaw, and make your messy deck ship-shape afterwards!**
