

Music Area

Your task is:

To listen to 'It's Oh So Quiet' by Björk (an Icelandic pop star), and think about how the artist creates quiet and loud dynamics in the music.

Use the instruments to create your own composition which focuses on differences in volume.

Think about:

- How can you create differences in volume using the instruments?
- Will **all** of the instruments play **all** of the time?
- Can you use different instruments to create different dynamics?

Music Area

I must...

Listen to the music, then work in a small group to create a composition with similar dynamics.

I should...

Discuss with my group how we will create different dynamics, how quiet and loud sounds can be produced.

I could...

Create lyrics to the song, which are sung by the group or by one singer.
