

Science Area

Your task is:

With a partner, group materials based on whether you think they are solids, liquids or gases.

To take a picture on an iPad, and airdrop it to your teacher.

Think about:

- What are the properties of materials in each of the different states?
- Which materials are more difficult to sort? Why?
- Do you and your partner disagree on any of the materials? Can you persuade them?

Science Area

I must...

Group the materials into three groups—solids, liquids and gases—and take a photo of my results.

I should...

Discuss with a partner while grouping the materials, and come to a decision between us.

I could...

Write the properties of the states of matter in each group, to show I made my decisions.
